

Job title: Project Manager – Entry Level / Junior position

About ShanX Medtech BV

ShanX Medtech BV (SXM, NL) is a dynamic young company dedicated to revolutionizing healthcare through innovative diagnostic tools. Our journey began with a deeply personal experience—the founder's mother's near-fatal struggle with a poorly treated bacterial infection. This ignited our mission to transform infection management, propelling us to develop pioneering solutions that prevent unnecessary suffering.

At SXM, impact is paramount. We're proud to introduce KAIROS™ IVD, our groundbreaking rapid antibiotic susceptibility testing device, poised to redefine how bacterial infections are treated. Our goal is clear: to equip healthcare professionals with the means to make informed treatment decisions swiftly and accurately. Through our innovative solutions, we're combating antibiotic resistance, enhancing patient outcomes, and saving lives.

Join us in shaping the future of healthcare, where every moment is vital in the fight against bacterial infections. We're seeking a motivated Project Manager to join our team and contribute to the development of this crucial diagnostic device. This is an exceptional opportunity to join us in our early stages and play a pivotal role in our future success.

About the role

As a Project Manager at SXM you will be responsible for the management of various projects within the company. The role of the Project Manager is crucial in ensuring effective communication and collaboration and contributing to the successful execution of the various IVD projects at SXM.

Responsibilities

Your responsibilities include, but are not limited to:

Project planning: Assisting in the execution and maintenance of project plans, timelines, and schedules. This involves working closely with senior scientists and managers and cross-functional teams to ensure alignment with project objectives and milestones.

Coordination: Facilitating communication and collaboration among team members, stakeholders, and external partners. This may include scheduling meetings, preparing agendas, and documenting meeting minutes to ensure clear communication and alignment on project goals and deliverables.

Documentation: Assisting in the preparation and maintenance of project documentation, including project plans, reports, and presentations. Ensuring that documentation is accurate, up-to-date, and accessible to relevant stakeholders as needed.

Required Qualifications

- Bachelor's or HBO degree in biology, Microbiology, Biomedical Engineering, or a related field.
- Candidates with up to 2 years of experience in project management are preferred, but entry-level candidates without experience are also encouraged to apply, provided they are eager to learn quickly.
- Fluency in English.
- Excellent communication skills.

Preferred Qualifications

- Fluency in Dutch is preferred.
- Passionate about working in a young IVD company.
- Ability in handling a diverse range of tasks.

Perks and benefits

- Competitive compensation and benefits package
- Access to professional development opportunities for career growth and advancement, including training resources.

- Flexible schedule and work arrangements
- Dynamic and collaborative work environment

Important Dates: The application period for this position will remain open until August 15th. Interviews will be conducted during the last two weeks of August. The anticipated start date is September 1st, 2024, with flexibility for a later start date by mutual agreement.

Position Details: This is a part-time contract for 24 hours per week, extending over three years, with the possibility of extension.

Location: The position will be in Nijmegen, with regular commuting to Eindhoven or other locations in the Netherlands.

Disclaimer: At SXM, we're dedicated to equality and diversity, welcoming individuals from all backgrounds.
